

Rolls-Royce Motor Cars
Product range

INTRODUCTION

Phantom Series II is the latest addition to the Rolls-Royce Motor Cars product range. Designed without compromise, the latest expression of the Phantom family has once again redefined the luxury car market.

Joining Ghost and Ghost Extended Wheelbase, each model has a personality of its own.

But all share the same powerful presence you expect from Rolls-Royce, and are the result of our desire to build the best cars in the world, in an ever-changing world.

THE PHANTOM FAMILY

“Take the best that exists and make it better.”

Sir Henry Royce.

Spurred on by the inspiring words of our founder, we set ourselves a challenge: “How can we take what many consider to be the best cars in the world, and make them even better?”

The result: Phantom Series II.

Each one features new design details, enhanced engineering and state-of-the-art infotainment systems.

By embracing technology and blending it with the traditional skills of our master craftspeople, we continue to produce iconic motor cars that are perfectly in tune with our times.

“When a Phantom drives by, the world stands still.”

Ian Cameron,
Chief Designer.

PHANTOM

Wherever you go in the latest incarnation of Phantom, you will never go unnoticed.

Instantly noticeable are the elegant Adaptive LED Headlamps, which feature a continuously lit bar running through their centre. As are the forged alloy wheels with a new fully-polished finish.

While the new eight-speed gearbox, coupled to the 6.75-litre V12 engine, offers acceleration so smooth it feels as if you have an infinite first gear.

With its powerful stance, classic proportions and physical presence Phantom is the very essence of the Phantom family.

One look is all it takes to confirm that this is a car of immense beauty and authority. It's no wonder then, that when a Phantom drives by, heads still turn.

“No effort has been spared to make Phantom effortless to drive.”

Helmut Riedl,
Director of Engineering.

PHANTOM INTERIOR

The clear and uncluttered dashboard fascia belies the amount of the latest technology you now have at your fingertips with Phantom Series II.

Only those controls required for everyday driving are present. Additional functions such as the new satellite navigation and infotainment system with its new 8.8 inch Control Centre Display, remain hidden until required.

The rear coach doors are an extraordinary feat of engineering. Together with the virtually flat floor, they enable you to enter and exit the rear compartment with grace and ease.

Once settled into one of the seats, which feature a new contemporary three flute design, you can listen to your favourite CD on the LOGIC7 audio system, which surrounds you with some of the most acoustically perfect sound you will hear outside of a concert hall.

“It’s a Phantom with even more presence.”

Ian Cameron,
Chief Designer.

PHANTOM EXTENDED WHEELBASE

Phantom Extended Wheelbase delivers the ultimate Rolls-Royce experience, both in terms of comfort and presence.

The additional 25 cm of legroom in the rear passenger compartment not only creates an interior space of palatial proportions, it also offers infinite possibilities for Bespoke personalisation.

It’s an indulgent private space. One that is perfect to work, entertain or relax in between engagements.

As the extra length also extends to the rear-hinged coach doors, you and your occupants enjoy even greater privacy and protection when entering and exiting.

P H A N T O M

“What could be more romantic than the sound of rain on a soft-top at night?”

Ian Cameron,
Chief Designer.

PHANTOM DROPHEAD COUPÉ

Phantom Drophead Coupé demonstrates a less formal and more relaxed side of Phantom.

Inspired by the J-class yachts of the America's Cup in the 1930s and the Riva motor launches of the 1950s, it continues the long tradition of two-door, four-seat Rolls-Royce convertibles.

At the touch of a button, the soft-top canvas roof retracts, allowing its occupants to embrace the elements and share the pleasures of open-air driving.

The picnic boot adds to its uniquely sociable character, providing a comfortable picnic seat for two adults as well as space for a hamper, making Phantom Drophead Coupé the ideal choice for sporting or social occasions.

“Rather than shutting out the elements, they are embraced.”

Charles Coldham,
Interior Designer.

The convivial interior of Phantom Drophead Coupé evokes the feeling of being aboard an elegant motor yacht.

The rear-hinged coach doors allow you to embark and disembark with ease.

While the teak decking and sisal carpets are perfectly in keeping with the car's informal elegance and nautical nature.

PHANTOM DROPHEAD COUPÉ INTERIOR

Each hood is tailored by hand, and when raised creates an intimate cabin that is almost as whisper-quiet as Phantom's.

“As soon as you sit in the driver’s seat you can sense the spirited nature of the Phantom Coupé.”

Helmut Riedl,
Director of Engineering.

PHANTOM COUPÉ

Phantom Coupé is a modern take on classic Grand Touring cars, and inspired by the Phantom II Continental of the 1930s. Its beautifully proportioned muscular body exudes performance and style.

The new colour-matched grille surround, visible exhausts and 21” ten spoke wheels further enhance its purposeful look.

Effortlessly powered by the same 6.75-litre V12 engine as Phantom, the Phantom Coupé has a more dynamic feel thanks to its shorter wheelbase, revised transmission, suspension and steering settings.

Supremely comfortable and virtually silent, Phantom Coupé is the perfect car for a transcontinental drive.

“The interior invites you to step into another world, especially at night.”

Alan Sheppard,
Head of Interior Design.

PHANTOM COUPÉ INTERIOR

The optional starlight headlining creates a unique, magical ambience; covering the entire length of the roof, its 1,600 fibre-optic lights give the illusion of a star-filled night sky.

Another truly defining feature of Phantom Coupé is the extensive use of expertly applied wood veneer. Drawing on the finest tradition of coachbuilt Rolls-Royces, it provides a

wonderfully warm contrast to the cool, aluminium finish of the dashboard.

Indeed, the sumptuous and calming interior of Phantom Coupé makes any journey as rewarding for the passengers as the driver.

“Phantom reclaimed Rolls-Royce’s position at the forefront of innovative automotive design, engineering and construction.”

Helmut Riedl,
Director of Engineering.

PHANTOM TECHNOLOGY

At the heart of the Phantom family is a lightweight aluminium spaceframe. This remarkable piece of engineering is one of the secrets behind Phantom’s ‘magic carpet ride’, and its adaptability.

Its incredible stiffness and light weight enhances the driving performance and improves comfort. It also reduces vibration, which in turn reduces noise and helps keep our interiors whisper-quiet.

This allows you to fully appreciate the Phantom’s LOGIC7 audio system. Using a patented surround algorithm to convert stereo sources into surround sound, it creates a much more realistic listening experience.

Meanwhile, the 6.75-litre V12 engine delivers a seemingly endless amount of power, and the refined performance that is unique to Rolls-Royce.

**"We make dreams
come true."**

**Thomas G. Jefferson,
Manager, Bespoke Sales.**

PHANTOM BESPOKE

Our Bespoke Programme allows you to create a car that is as unique as you are.

From the smallest detail to the boldest statement, we pride ourselves in making your dreams come true.

Be it for a discreet humidor in the glove compartment, or an illuminated Spirit of Ecstasy on the grille, our Bespoke team will be only too happy to oblige.

We can create exterior paint or interior leather to match any colour you desire, and should you want your initials embroidered on the

seat headrests or inlaid into the veneer we will do that too.

No request is considered too extravagant or unreasonable. On one occasion, we even furnished an interior with veneer from a tree felled on the customer's estate.

But that's just for starters, there is literally no limit to what can be achieved.

“Simplicity is the
hardest design
principle to follow.”

**Ian Cameron,
Chief Designer.**

The principle of delivering simplicity out of complexity runs throughout Ghost and Ghost Extended Wheelbase. Everything is designed, engineered and crafted to be so invitingly approachable, so simple, it encourages you to regard either car as appropriate for any occasion.

The advanced technology serves only to make driving easier and more enjoyable. While the phenomenal power of the twin turbo 6.6-litre V12 engine is both effortless and rewarding.

Simplicity may be hard to achieve, but it's worth the effort.

“It looks natural,
not styled.”

Andreas Thurner,
Exterior Designer.

GHOST

Ghost is a Rolls-Royce in its simplest, purest form.

The classic Rolls-Royce proportions are all present and correct: the ideal 2:1 ratio of the height of the wheels to the height of the body; the long wheelbase and bonnet; the short overhang at the front and the long overhang at the rear.

Indeed, our Chief Designer has his own unique way of describing

Ghost. “Ghost is more like a well-tailored jacket than a formal suit. Its powerful presence and proportions leave you in no doubt that it’s cut from the same cloth as the rest of the marque.”

In our opinion, it sums up perfectly what we set out to achieve.

“Ghost is as refined
and cosseting as
anything this marque
has ever produced.”

Charles Coldham,
Interior Designer.

GHOST INTERIOR

Entering and exiting Ghost is equally graceful. Its low sill height means you step effortlessly on to, rather than climb into, the car.

While the rear-hinged coach doors, which open to an unrivalled 83 degrees, add an extra sense of theatre for the rear passengers.

Inside, you are greeted by a contemporary interior with large expanses of soft full-grain leather, natural wood veneers and deep tufted carpets.

The cashmere-blend roof lining adds to the sense of openness and space. So too does the optional panorama sunroof.

The overall impression is of being cocooned in your own private sanctuary from the outside world.

“Whether you’re in the mood to drive or be driven, it’s the perfect choice.”

Ian Cameron,
Chief Designer.

GHOST EXTENDED WHEELBASE

Ghost Extended Wheelbase is designed to be as enjoyable to drive as it is to be driven in.

Even though it is 17 cm (6.7 inches) longer than Ghost, our engineers have gone to great lengths to ensure it offers the same exceptional driving dynamics.

Consequently, the temptation to only drive it yourself may prove too great. But that would be to deny yourself one of the great pleasures of owning Ghost Extended Wheelbase – stretching out in the back whilst being driven by someone else.

“The first thing that strikes you is the amount of extra legroom.”

Helmut Riedl,
Engineering Director.

As soon as you open one of Ghost Extended Wheelbase’s rear coach doors, it is immediately obvious where every millimetre of the additional length has been added.

The 17 cm of extra legroom inside the rear compartment, invites you to stretch out as you settle into the wide-expanse of beautifully soft, flawless leather upholstery.

GHOST EXTENDED WHEELBASE INTERIOR

As you do, you will barely hear any noise when your driver starts the engine. Even while travelling at speed, the interior remains whisper-quiet.

So all you have to do is sit back and enjoy Rolls-Royce’s famous ‘magic carpet ride’.

“You can’t describe it,
you have to drive
them, and when you
do you’ll have a
smile on your face.”

Helmut Riedl,
Director of Engineering.

EFFORTLESS PERFORMANCE

Ghost and Ghost Extended Wheelbase will effortlessly propel you from 0 to 62 mph (100 km/h) in 4.9 seconds and 5.0 seconds respectively.*

While these figures are impressive in their own right, what separates them from other performance cars is how gracefully and smoothly their new twin turbo 6.6-litre V12 engine delivers a seemingly endless surge of power.

This is hardly surprising considering a maximum torque of 780 Nm (575 lb ft) is available from as low as 1,500 rpm, and it’s capable of generating 563 bhp (420 kW/570 PS).

What is surprising though, is the impression the eight-speed automatic ZF gearbox gives of having an infinite first gear. And the feeling of utter exhilaration that only a beaming smile can truly express.

* Manufacturer’s test results.
USA specification 5.0 seconds and 5.1 seconds.

“With the Ghost Bespoke Programme you can create a car that’s as individual as you are.”

Thomas G. Jefferson,
Manager, Bespoke Sales.

GHOST BESPOKE

With the Bespoke Programme, you can complement the contemporary exterior and interior styling of your car with many personal touches and embellishments that showcase the extraordinary skills of the craftspeople at Goodwood.

For the exterior, you can choose from an extended palette of stunning paint colours. Then, should you wish, you could add a set of single or twin coachlines. Each one is painted by hand using a special brush made from ox and squirrel hair, and takes around three hours to apply.

Our meticulous approach to detail also extends inside the car.

The additional range of veneers can be enhanced with stainless steel pinstripes. Or you could have the Spirit of Ecstasy logo or Rolls-Royce monogram inlaid by hand into the veneered door cappings.

Not only can you choose from a wider range of leather colours and combinations to furnish and trim the interior, it can also be finished with seat piping and contrast stitching. Or you can create your own colour scheme using a palette of different leather colours, which can be applied in any combination you desire. You can also have the Rolls-Royce monogram or your initials embroidered into the headrests.

“The intention was to create a finely crafted, contemporary building that works in harmony with its natural setting.”

Sir Nicholas Grimshaw,
Architect.

THE HOME OF ROLLS-ROYCE

Goodwood is the modern home of Rolls-Royce Motor Cars. Set in the South Downs, and designed by the world-renowned architect Sir Nicholas Grimshaw, our modern day home embodies our ethos of bringing modern technology and traditional skills together.

Here the Ghost family and the Phantom family are hand-built under the same roof – one of the largest single-span 'living roofs' in Europe. Covered with thousands of sedum plants, it changes colour with the seasons and helps our building blend seamlessly with the surrounding countryside. As do the cedar cladding louvres, which automatically adjust to shield the glare of the sun.

Thanks to the extensive use of glass in the building's construction, the workshops are flooded with natural light, which creates the perfect environment for our craftspeople to hone their skills and transform the finest natural materials into the finest cars in the world.

“A Rolls-Royce feels as if somebody made this car with skilled and caring hands just for you.”

Jörg Bause,
Manufacturing Director.

PRODUCTION

Every Rolls-Royce is built on our state-of-the-art assembly line. And each car passes through over 60 pairs of hands before it's handed over to its owner. These belong to the skilled craftspeople and technicians at our Goodwood plant.

In our paint shop, it takes seven days and five coats of paint and high gloss clear lacquer to create the flawless finish our customers expect and we demand. Only after it has been meticulously polished by hand for over five hours is it allowed to rejoin the assembly line.

In the meantime, our wood craftspeople will have spent up to a month shaping, sanding, lacquering and hand-polishing the separate wood parts that go into each car. In Phantom, the veneers are book-matched by eye to create a symmetrical mirror image of the grain through the centre of the dashboard.

PRODUCTION

“We put the car through its paces and stress-test every aspect to ensure that it is perfect.”

David Terry,
Test and Finishing.

Inside the leathershop, the upholstery for the interior gradually takes shape. As even the slightest imperfection has no place in a Rolls-Royce, we only use A-grade bull leather. This ensures the upholstery has no unsightly scars or stretch marks.

The hides are then drum-dyed, rather than painted, so that the colour permeates right through the leather. This process also imparts a natural suppleness to the leather and means it will neither squeak nor crack.

Before a Rolls-Royce is deemed ready to leave Goodwood, it must pass a series of stringent quality tests to guarantee that it is perfect. Only when we are 100% satisfied will it be handed over to its owner.

“Strive for perfection
in everything you do.”

Sir Henry Royce.

ROLLS-ROYCE HERITAGE

Charles Rolls and Henry Royce met for the first time on 4 May 1904 over lunch in the Midland Hotel, Manchester. On that day, they agreed to start producing and selling cars under the name Rolls-Royce.

Within three years, they launched The Silver Ghost – a car of unprecedented refinement and reliability. This was demonstrated when it was driven virtually non-stop between London and Glasgow 27 times – a staggering 14,371 miles. It led a motoring journalist to describe Rolls-Royce as producing ‘the best car in the world’. A tradition we are proud to continue with Ghost and Phantom.

Indeed, we are still driven by Sir Henry Royce’s inspiring words. They encourage our designers to challenge automotive conventions and produce ideas others would consider impossible. They challenge our engineers to find innovative solutions to make them possible. And spur our craftspeople to painstakingly turn them into the finished product.

It’s how we’ve always made our cars, and it’s how we always will, which is ultimately what makes a Rolls-Royce a Rolls-Royce.

“A new EX model explores what might be.”

Ian Cameron,
Chief Designer.

EXPERIMENTAL CARS

Throughout our history, we have used experimental cars to develop new ideas and technologies that could shape the future of the marque.

EX models are not concept cars. Each one is built to be a fully functioning vehicle in its own right, and builds on a legacy which began in 1919 with 1EX. And while they are not designed to go directly into production, many of the ideas they inspire do.

Indeed, Phantom Drophead Coupé, Phantom Coupé and Ghost all started life as fully-engineered EX cars - 100EX, 101EX and 200EX, respectively.

With our latest EX model, 102EX, we created the world's first electric vehicle in the ultra-luxury segment. It was designed as a working test-bed to see whether a battery powered engine could deliver an authentic Rolls-Royce experience.

By exploring bold new technologies through living, breathing EX models we can ensure that Rolls-Royce remains at the forefront of automotive design and engineering.

PHANTOM TECHNICAL SPECIFICATION

Dimensions

Vehicle length	5842 mm / 230.0 in
Vehicle width	1990 mm / 78.3 in
